

Professional Testing Solutions

Significantly improve
your product quality while
increasing profitability with
Quality Assurance services
from **ProTest Solutions**

We at ProTest Solutions have been assuring the quality and executing Release Management of highly complex applications used in the aviation industry since late 2011 with great success together with our sister company Ključ Savjetovanje. The products under test have seen a steady increase in quality. With a strong focus on test automation, our Quality Assurance Engineers have ensured more consistency and stability in the overall software quality and a significantly shorter time-to-market.

About us

During these years of operation, Ključ Savjetovanje has become an ISTQB® partner, with all of our Quality Assurance Engineers being certified. The ISTQB® Certified Tester scheme is internationally recognized as the world-wide leader in the certification of competences in software testing.

By moving into the more advanced levels of the ISTQB® certification scheme we plan continuous growth in our expertise.

Benefits when implementing Quality Assurance in your Software Development Life Cycle

Reduced costs

Increased customer satisfaction

Shorter time-to-market

Increased employee satisfaction

Higher development productivity

What can we do to increase the quality of your products?

Test Organization Consulting

- Evaluation of current Test Organization Status
- Recommendations to improve your Test Organization
- Auditing of test policies and procedures

Test Organization Implementation

- Implement best practises throughout the SDLC
- Design and Implementation of Test Policies, Test Strategies and Test Plans

Static Testing Services

- Reviewing of requirements specifications, test basis, technical specifications
- Preventing defects rather than finding them in testing

Training Services

- Prepare your Quality Assurance Engineers for ISTQB® certification exams
- Outsource part of the training for Quality Assurance Engineers

Functional Testing Services

- Design and execution of test cases (manual & automated)
- Focuses on a function the system or component should perform

Non-Functional Testing Services

- Performance & Stress Testing
- Usability Testing
- Reliability Testing

Test Automation Services

- Framework creation
- Test case automation
- Maintenance of automated test scripts

Release Management

- Streamlining different departments to release regular software updates with the lowest amount of risk
- Analysis, execution and reporting towards product and project stakeholders

Mission

The mission of you as our client is to deliver software of exceptional quality and sustain or gain a market leader position. Our mission is to cooperate with you to achieve your mission by offering fully independent and reliable Software Quality Assurance Services.

Vision

Live in a world where Software Quality Assurance is a given and continuously preach the necessity for Quality Assurance in the software community for the ever growing number of software solutions.

Our values

Excellence

By providing excellence in our work, we do not only grow the business of our clients, but also our business and ourselves as individuals.

Honesty

We are realistic, down to earth, honest and we deliver what we committed to. That's why we are the organization you trust to assure the quality of your software.

Respect

Our clients, employees and others in contact with our organization deserve and receive the respect and dignity which we would like to receive ourselves.

Passion

Our passion drives and pushes us to drive faster, safer and to new realms.

Teamwork

The quality of a good team is not just the sum of the qualities of all of its' members, but a well oiled machine that works towards the shared goals.

Fun

A work environment that includes fun is the most productive environment. As our client you will experience this in our communication and in dealing with our teams.

Growth

Each and every day we should aim to grow individually and as a company to come home wiser, more enlightened, more satisfied and 'richer' than the day before.

Innovation

True innovation supports discovering new paths, new solutions and solving new problems on the way. We encourage and reward creativity and initiative from our employees.

Technology expertise

.....

API Test Automation

- Runscope
- Postman
- Protractor
- SoapUI

User Interface Automation

- Protractor
- Selenium
- Ranorex
- HP QTP/UFT

Performance Testing

- HP LoadRunner
- JMeter

Defect Tracking Tools

- Microsoft Visual Studio (VSTS)

Test Management Tools

- Microsoft Visual Studio (VSTS)

Application Types

- APIs
- (Remote) Desktop applications
- Mobile applications
- Web applications
